Slim Industrial Relay Type RSLM Electromechanical

Product Description

The RSLM is a very slim electromechanical relay that can switch resistive loads with a maximum switching

current of 6A. It is available with 1 changeover contact (SPDT) or 1 normally open (SPST) contact.

The RSLM is suitable for use with PLCs, valves actuation or solenoids. The DIN rail socket (ZRLS) facilitate the

• Slim size (width 5mm)

High sensitivity: Approx. 170mW

• Dimensions: 28.0 x 5.0 x 15.0mm

installation of the RSLM relays on DIN rail, while the ZRLP enable easy installation on PCB.

Notes:

1) Max voltage refers to the max voltage which the relay coil could endure for a short period of time.

2) For products with a rated voltage of \geq 48V, measures should be taken to prevent the coil overvoltage in order to protect the coil and the application (eg. connect diodes in parallel).

3) Do not install RSLM001 types on either of the smallest sides or facing downward.

• High breakdown voltage 4kV (between coil and

• Surge voltage up to 6kV (between coil and contacts)

• Changeover contact (SPDT) or Normally Open (SPST)

· Conforms to VDE 0700, 0631 reinforced insulation
